ST OptiCam™ Pre-Polished Fiber Optic Connectors

**Specifications**

ST pre-polished fiber optic connectors shall be TIA/EIA-604 FOCIS-2 compliant and contain a factory-terminated fiber, eliminating field polishing and adhesive. ST pre-polished connectors shall have an average insertion loss of 0.3dB per mated pair for multimode and singlemode fiber. ST pre-polished connectors shall captivate fiber and buffer in one action allowing for up to two re-terminations with no degradation in performance.

**Technical Information**

- **Standards requirements:** TIA/EIA-604 FOCIS-2 compliant; exceeds TIA/EIA-568-B.3 requirements
- **Fiber compatibility:** 62.5/125µm OM1, 50/125µm OM2, 10Gig 50/125µm laser optimized OM3/OM4 and 9/125µm OS1/OS2
- **Fiber size and type:** 900µm tight-buffered fiber
  - 250µm coated fiber, by using F250BT-C 250 micron fiber build-up tube kit or FO6CB or FO12CB fan-out kit
- **Jacketed cable size:** 1.6mm – 2.0mm and 3.0mm jacketed cable with optional boots
- **Ferrule type:** Zirconia ceramic or composite ferrule with a pre-polished fiber stub
- **Insertion loss:**
  - Ceramic: 0.3dB average (multimode and singlemode)
  - Composite: 0.3dB average (multimode)
- **Return loss:**
  - Ceramic: >20dB (multimode), >26dB (10Gig multimode), >50dB (singlemode), >50dB (10Gig multimode), >50dB (singlemode)
  - Composite: >20dB (multimode)

**Key Features and Benefits**

**ST OptiCam™ Connectors**

- **Factory pre-polished fiber stub endface**
  - Eliminates inconsistent and time-consuming field polishing to deliver required optical performance; reduces termination time (less than half the time of field polish connectors) and the number of installation tools required

- **Dual cam design with fiber and buffer clamps**
  - Secures both the fiber and the buffer during the camming step to facilitate consistent termination results; reduces the termination time compared to conventional termination methods
  - Allows up to two re-terminations to achieve optimum termination results; reduces the number of rejected connectors and terminations to provide yield rates approaching 100% for lower installed costs

**OptiCam™ Termination Tool**

- **Universal termination tool**
  - Secures both fiber and buffer in one action for all OptiCam™ Connectors with connector specific cradles (included); ensures fast, consistent, and optimal terminations

- **Integrated visual termination indicator (VTI)**
  - Offers visual indication of proper termination after the cam step has been completed; virtually eliminates operator error to deliver a higher yield for a lower installed cost

**Applications**

ST fiber optic connectors are widely used in fiber optic backbone and horizontal applications for high-speed data transmission. Typical applications for ST OptiCam™ Connectors include maintenance or emergency restoration of fiber networks and retrofit/initial install in both behind-the-wall (BTW) and in the permanent side of panelized interconnect and cross-connect.
