

An easy way to reduce waste and make projects profitable!

Contractors use Graybar's wire and cable management services because they're flexible and can be custom-tailored for each job. The services handle building wire, medium voltage cable, data network cable, A/V cable and fiber, enabling our customers to have the products available to them when, where and how they need them.

Save labor, time and money

Graybar services such as cutting and paralleling, prepared reels and stands that can be easily moved on jobsites, and preinstalled pulling eyes can provide you with significant savings and make your installations safer, easier and more efficient.

Graybar's solutions are designed to:

- **Reduce:** Inventory shortages, damaged inventory, need for expedited shipments, material lost on the job and under-utilized or deteriorating inventory
- **Provide:** Shipments of cut lengths, project tracking, dedicated inventory, just-in-time deliveries and project savings
- **Prevent:** Job delays and material lost on the job
- **Allow:** Design and engineering changes
- **Save:** On inventory management and total project cost

This process can be performed for:

Electrical and communications wire and cable in industrial, OEM, commercial and construction markets.

Graybar Sustainability

Utilizing Graybar's wire and cable management services can mean less wasted or under-utilized product. Not only is this good for your bottom line, but it can also help lessen the environmental impact of your projects.
